

**Fast, Flexible Medical Device Adhesives –
Think Henkel & See The Latest at MDM West 2017**

FOR IMMEDIATE RELEASE:

January 23, 2017, ROCKY HILL, Conn. -- Henkel Adhesive Technologies, the leading solution provider worldwide for adhesives, sealants and functional coatings, and equipment to the Medical Device industry for more than four decades will be showcasing its newest innovations at booth 3040 in Anaheim, Calif. February 7 – 9 at MDM West 2017. New highly flexible and rapid LED curable adhesives specifically formulated for medical device assembly will be demonstrated, along with the latest high power LED curing systems.

From light curable, room temperature curable and combination curable (light and RT) Henkel's latest medical device adhesives offer rapid processing, enhanced flexibility, high adhesion to a wide range of materials including hard-to-bond substrates, fluorescence for detection and tested to the industry's most comprehensive ISO 10993 biocompatibility standard. A wide range of formulas and viscosities is offered to ensure a solution for a multitude of device applications.

New advancements in LED curing systems will also be available for hands-on trial. This includes the highest powered hand-held, spot and flood curing configurations to ensure rapid curing of all device designs. Multiple wavelengths and variable output are a few of the key features offered in these new LED curing systems.

Henkel experts can provide the right solution - whether it's a quick product recommendation or a full-blown, turn-key process. The skilled medical device adhesive experts will collaborate on process improvements and in joint development programs. Henkel's labs and testing programs, analytical services and prototype testing and preparation are state-of-the-art.

Stop by the Henkel booth at MDM West 2017 (Booth #3040) to discuss how we can help you, see the latest adhesive and curing system innovations, pick up the new medical device adhesives selector guide and your own LED laptop keyboard light.
