

Lapp Debuts New Cable and Cable Gland at ATX West Anaheim

Visit Lapp USA at ATX West Anaheim, Booth #4361

Florham Park, NJ – December 1, 2016– The Lapp Group will be debuting its new SKINTOP Hygienic stainless steel cable gland, ÖLFLEX® VFD 2XL symmetrical motor and drive cable, ÖLFLEX® 409P Oil- and Abrasion-Resistant Cable and at next year's ATX West Anaheim.

Lapp's SKINTOP Hygienic stainless steel cable gland features FDA-approved material and meets IP68 and 69K standards. Designed to withstand high pressure and high temperature wash-downs, its special design prevents microorganisms and bacteria from sticking to the surface. A polyamide insert and special elastomer sealing element deliver additional food and beverage safety.

The new ÖLFLEX®VFD 2XL symmetrical motor and drive cable from Lapp is rated for voltages as high as 2kV and is suitable for high horsepower applications. This large gauge cable offers three symmetrical grounds and features a helical copper tape shield and meets many key approvals. Robust, oil- and UV-resistant, it delivers a minimum bend radius of 15 x cable diameter.

The new ÖLFLEX® 409 P is a robust polyurethane outer sheath control cable that delivers increased durability under harsh conditions. ÖLFLEX® 409 P is also resistant to contact with many mineral oil-based lubricants, diluted acids, aqueous alkaline solutions and other chemical media.
