MTD Micro Molding to Showcase Bioabsorbable Molding Expertise & Micro Mold Simulation at MD&M West 2017

CHARLTON, MA - (January 13, 2017) - MTD Micro Molding (www.mtdmicromolding.com), a long-time leader and expert problem solver in micro-injection molding for the medical device industry, will be showcasing their bioabsorbable micromolding expertise at MD&M West 2017. The expo takes place February 7-9, 2017 at the Anaheim Convention Center in Anaheim, CA.

“MTD has a 45-year tradition of helping customers refine their designs and select the best material for optimal part functionality while maximizing costs” said Dennis Tully, president of MTD Micro Molding. He added, “And for the past 15 years, we have been strategic partners with innovative medical OEMs, producing bioabsorbable micro molding breakthroughs not thought possible”.

For the first time, MTD will be displaying a bioabsorbable micro mold with simulated automation, complete with custom end-of-arm tooling. The mold will be displayed with a microscope so attendees can clearly view the intricacies of the tool.

Various bioabsorbable micro injection molded examples will be on display at MTD’s booth, showing what micro molding makes possible for bioabsorbable applications in orthopedic and drug delivery markets today. As always, all samples can be handled by attendees and are encouraged to inspect the details under magnification.

Discover MTD’s 6 keys to bioabsorbable success, including runner optimization which can save over \$100,000 in material every year, depending on production volume. MTD’s keys to bioabsorbable success decrease costs and accelerate speed to market, while improving part quality and performance.

Visit MTD at Booth #1450 to see the latest in medical micro molding and to review your next project with the MTD team.

About MTD Micro Molding

Founded in 1972, MTD Micro Molding custom-crafts ultra-precision molded components that meet the exact requirements of companies in the medical device industry. In-house tooling, unparalleled bioabsorbable molding expertise, ISO 13485 certified systems, state of the art equipment – all under one roof. Our exclusive focus on bioabsorbable and drug delivery medical micro molding ensures successful delivery of complex custom products that nobody else can produce.
