Portescap Features Sterilizable Brushless DC Motor Solutions at MD&M West (Booth 2497)

MD&M West attendees are invited to visit booth 2497 to learn more about Portescap's innovative miniature and specialty motors. In addition to other medical applications, attendees can learn about Portescap's sterilizable brushless DC motors (BLDC) for surgical power hand tool design.

Portescap has more than 20 years of experience in surgical power hand tool applications designing and developing sterilizable motor solutions. Benefits of the company's design solutions include high efficiency for low thermal rise in the surgeon's hand for tools such as:

- Arthroscopic & ENT Shavers
- ENT & Spine Drills

110 Westtown Road • West Chester, PA 19382 • www.Portescap.com •
Phone: 610-235-5499 • Fax: 610-696-4294 • sales.america@portescap.com

- Orthopedic Drills & Saws (Joint replacement)

Portescap sensed solutions are designed to withstand up to 3,000 autoclave cycles. Designs offer high torque and speed for increased hand tool power for shorter surgery cases.

[About Portescap](#)

Portescap offers the broadest miniature and specialty motor products in the industry, encompassing coreless [brush DC](#), [brushless DC](#), stepper can stack, gearheads, digital linear actuators, and disc magnet technologies. Portescap products have been serving diverse motion control needs in wide spectrum of medical and industrial applications - medical, life science, instrumentation, automation, aerospace and commercial applications, for more than 70 years.

Portescap has manufacturing centers in the United States, St. Kitts, and India, and utilizes a Global Product Development network with research and development centers in the United States, China, India, and Switzerland.
