Design For Excellence (DFx) Services is a key topic for Medical Device OEM's at the MD&M West Show in Anaheim

SMTC Corporation a global electronics manufacturing services provider will be show casing Design for Excellence (DFx) services through the early stages of value engineering development at the upcoming Medical Device & Manufacturing Show (MD&M) in Anaheim (February. 07-09) at **Booth 610**.

SMTC's Brian Morrison, Director of Value Engineering & Technology will discuss how early involvement in the product design cycle can provide OEM customers with a product that is more cost effective, increased manufacturability and quality, has higher reliability and a longer overall lifecycle.

"During the involvement in design reviews we focus on key areas throughout the cycle and provide critical feedback to our customers to address potential issues and ensure a successful new product introduction." said Brian, "We focus on every aspect of design and manufacturing processes assessing all impacts on cost, function, program schedule and overall requirements."

Josh Chien, Senior, Vice President of Global Sales, Marketing & Customer Experience says, " The MD&M West show provides the best platform for Medical Device OEM's and SMTC the opportunity to discuss key topics surrounding both manufacturing solutions such as quick-turn prototyping to full product manufacturing and value engineering services in the form of Design For Excellence (DFx). Josh continues to say, "Our team of experts will be on hand to discuss the benefits that have an impact on the design, development and production of medical devices". "These discussions at MD&M West will advance the innovation and implementation of driving product optimization through early stage value engineering development of medical devices over the next few years."

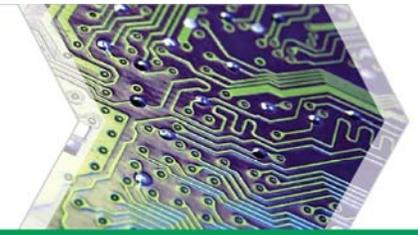

SMTC Corporation will be exhibiting (**Booth 610**) at MD&M West, February 07-09 at the Anaheim Convention, Center.

Come and see us to discuss your medical electronic manufacturing requires and learn how we can accelerate your product to market.

About SMTC Corporation: SMTC Corporation, founded in 1985, is a mid-size provider of end-to-end electronics manufacturing services (EMS) including PCBA production, systems integration and comprehensive testing services, enclosure fabrication, as well as product design, sustaining engineering and supply chain management services. SMTC manufacturing facilities span a broad footprint in the United States, China and Mexico. SMTC services extend over the entire electronic product life cycle from the development and introduction of new products through to the growth, maturity and end-of-life phases. SMTC offers fully integrated contract manufacturing services with a distinctive approach to global original equipment manufacturers (OEMs) and emerging technology companies primarily within industrial, computing and communication market segments. SMTC is a public company incorporated in Delaware with its shares traded on the Nasdaq National Market System under the symbol SMTX. For further information on SMTC Corporation, please visit our website at www.smtc.com (<http://www.smtc.com/>).
